Crane Remanufacturing Program

Manitowoc

GROVE
by **Manitowoc**

Ring Power Crane is a Manitowoc EnCORE Partner

Remanufacture, Refurbish or Rebuild?

What is the difference? When it comes to extending the life of your cranes, you have many options, and Ring Power Crane is committed to making sure that we find the solution that is best for you and your machine.

Authorized Manitowoc Encore Partner (EP) Remanufacturing - When we remanufacture a crane through Manitowoc's EP program, it is fully restored to "like new" condition per the manufacturer's original specifications. Every detail is examined and addressed. Authorized MP rebuilds come with a 12 month/ 1000 hr. warranty - parts and labor on new parts replaced.

Refurbishing - If your crane isn't ready to be completely remanufactured, or you are just looking for a specific system to be overhauled, our refurbishing program may be a cost-effective option for you. (*Refurbished Manitowoc and Grove cranes carry a 6-month parts and labor warranty on new parts replaced.*)

Rebuilding - Ring Power Crane's rebuild program is generally for major repairs, focusing on safely returning a crane to service per the customer's scope of work.

EnCORE

Rebuild. Repair. Remanufacture. Exchange.

Ring Power Crane is a Manitowoc EnCORE Partner. Our factory-trained technicians are equipped and qualified to perform factory certified service on all Manitowoc and Grove cranes, on your schedule and at a predetermined cost – including:

- Complete disassembly to bare frame
- Inspection of all weldments, components, parts and structures
- Refurbishment of eligible components, parts and structures
- Installation of new parts and components, including electrical harnesses, instruments, drive lines, hydraulic pumps, hoses, etc.
- All new Crane Care parts installed on Remanufactured machines are covered by a 1-year extended factory warranty
- Quality paint finish
- Work performed to factory specifications so that original load charts and structural warranty remain valid

Repower Your Crane to Achieve Emissions Compliance

Have you noticed the increasing number of bid specifications that require machines to meet certain emissions requirements? Are your older machines fuel costs keeping them in then yard when they could be on a job?

Retrofitting your crane with a Tier 3 or Tier 4 engine will not only reduce fuel consumption but also bring the machine into compliance with current emissions

standards for heavy machinery.

Requirements vary by location, but Ring Power Crane can help you determine the most cost-effective solution for your crane.

We understand the strict requirements of your crane's original structural warranty, and we can assure that any retrofits we install will not affect the terms of your coverage.

Why Choose Ring Power Crane?

Ring Power Crane has achieved the highest level of certification from Manitowoc Cranes – an EnCORE Remanufacturing Partner.

To achieve this we have demonstrated some of the highest levels of shop

capability and tooling, ongoing technician training programs, and among of the strictest contamination controls in the industry.

And you don't have to own a Manitowoc or Grove crane to benefit from this effort.

RING POWER CRANE

A Division of Ring Power Corporation

Superior shop capability, invested in industry leadership

Fabrication Facilities

Ring Power's welding and machine shops are among the most capable in the heavy equipment industry.

From executing precise repairs to recreating out-of-production parts, and even customizing items for specialty application, our fabrication facilities are top-flight.

Paint Shop

Ring Power has professional paint facilities featuring spray booths built specifically for large construction equipment.

Advanced Chrome Technologies

Using a high-velocity oxy-fueled thermal spray process, ACT's high-density metal alloy coating becomes an integral part of cylindrical surfaces to which it is applied. The result is a surface harder than steel, highly corrosion resistant and as smooth as silk. Applied to hydraulic cylinder rods Ring Power's ACT coating has tested to last three times as long as traditional chrome plating. (And it is a more environmentally safe process.)

Ring Power Crane is your full-service partner

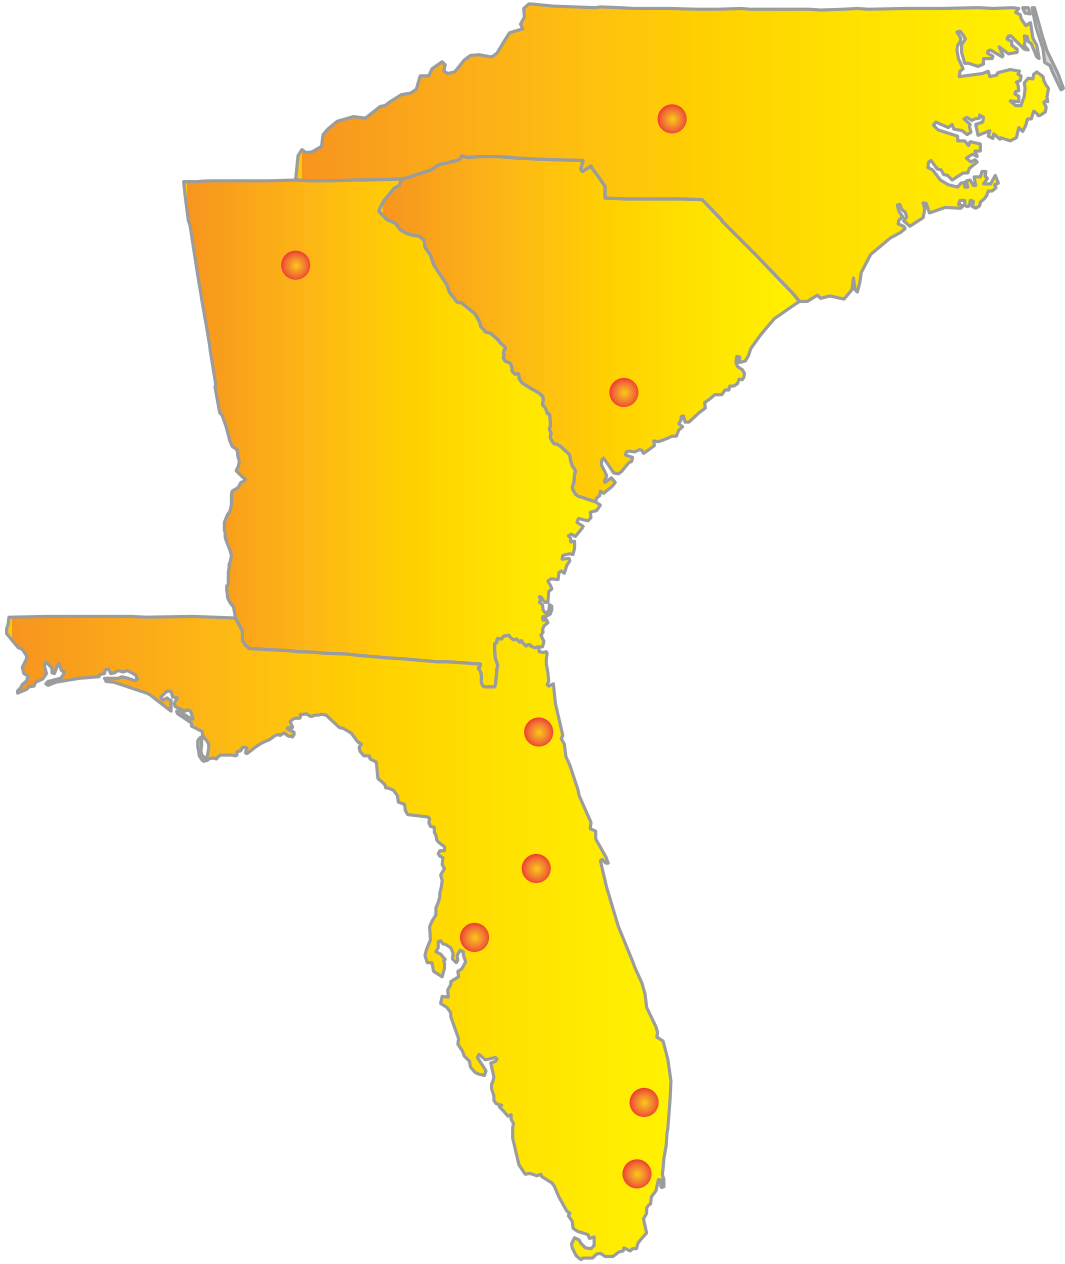

Auction Services

Looking for a used crane to remanufacture to fill a need in your fleet? Ask about Ring Power's Auction Services. We can help you locate the right machine at a favorable price.

New Crane Sales

Ring Power Crane is a Manitowoc Dealership offering Manitowoc, Grove and National Crane Products as well as several other brands of lifting solutions.
